

Teodora Baci

PRINCIPAL PRODUCT MANAGER – AGENTIC AI & ENTERPRISE AUTOMATION

teodorabaci16@gmail.com · linkedin.com/in/teodora-baci · teodorabaci.com · Bucharest · Remote (Europe)

First PM at EverWorker (agentic AI platform): **\$0 → \$1.4M ARR** (Q1 FY27) and **2 → 16 customers running the platform themselves** in under a year. Previously PM at UiPath, where I delivered the chat experience of Autopilot for Developers (20,000+ users) and co-led Healing Agent, after 7 years as developer, forward deployed engineer, and trainer – from pre-IPO startup to global leader.

Healing Agent acceptance

EXPERIENCE

Principal Product Manager - EverWorker

2025 – Present

First PM · Agentic AI platform · Bucharest / remote

- Principal PM for the entire platform: **Build, Discover, Govern**, the Universal Connector, Triggers and the Context Engine – the engines the company's AI SDR product also runs on
- Took the platform from **\$0 to \$1.4M ARR** (Q1 FY27) and from **2 to 16 customers running it themselves** in under a year
- Discover**: an AI business analyst that interviews a team by voice or chat, writes the requirements document and turns it into a working AI worker
- Build and Govern**: a Claude Code plugin that deploys what a builder makes into a governed workspace (tenant isolation, roles, credential vault, execution logs), where it runs on a schedule for the whole team
- Found why customers were dropping off: the agents were **invisible** to the people they worked for, not missing features. Designed and shipped the fix: worker profiles, recent activity, a workforce organised by department
- Built the product function from scratch: strategy, roadmap, release process and the design team

Product Manager, Core Products - UiPath

Apr 2024 – Mar 2025

Enterprise automation platform · NYSE: PATH · Bucharest, Romania

- Delivered the chat experience of **Autopilot for Developers**, bringing the agentic experience into UiPath Studio, with the lead PM and engineering; the product reached **20,000+ users**
- Co-led **Healing Agent** from early development to public preview; **88% recommendation acceptance**
- Owned **UI Automation core features** used by most of the Fortune 500, including the **Object Repository** revamp (2024); designed the **Intelligent Recorder** – observes how a user works, infers intent, and generates the automation
- Keynote** at UiPath AI-Powered Automation Summit, Milano; **speaker** at UiPath Forward 2024, Las Vegas, and DevCon, Bengaluru

Technology Services Manager - UiPath

Dec 2021 – Mar 2024

Global scope · Bucharest, Romania

- Led a team of 5 delivering automation programs for **25+ Fortune 500 and government clients**, including Mayo Clinic, Generali, Fujitsu, GE, and EY
- Delivered **360+ hours of training in a single year**; main trainer and key contact for Generali's automation learning path, from citizen developers to professional developers
- Solution architect and senior developer on first-of-their-kind implementations (Fujitsu, FanDuel, University of Liverpool); surfaced a bug spanning 5+ products and escalated product gaps directly to UiPath product teams
- SME for **Citizen Development**: owned the official training curriculum (ILT) across multiple releases, working across Product, Engineering, Academy, and Partner Enablement

Automation Developer (Forward Deployed Engineer) - UiPath

Oct 2018 – Nov 2021

Joined pre-IPO, when UiPath was still a startup · Bucharest, Romania

- Delivered **20+ global automation projects** across developer, business analyst, and solution architect roles; embedded on-site with enterprise customers – **forward-deployed**
- Co-built **StudioX** (2019), UiPath’s no-code builder for business users, and created its Global Error Handler – the ancestor of today’s Healing Agent; work that earned an offer to become its PM
- Led **100+ trainings** and **10+ Citizen Developer programs** for clients and partners worldwide

Web Developer - Forward Software

Oct 2016 – Sept 2018

Bucharest, Romania & Milan, Italy

- Built and maintained a financial-critical platform for Romania’s #1 leasing corporation; shipped the CRM module end-to-end (Java, Oracle)

SKILLS

Product Leadership

Product strategy · Revenue OKRs · Continuous discovery · Competitive analysis · Go-to-market · Roadmap planning · Cross-functional & people leadership

AI & Automation

Agentic AI · LLMs · RAG · MCP · No-code/low-code · RPA · UI Automation · API integration · UiPath (expert) · Claude Code · Java

Superpower

Explaining complex technical things to non-technical people – the skill that shaped every product I’ve built.
